

DID YOU EVER THINK YOUR BABY'S FIRST WORD
MIGHT **NOT** BE VERBAL?

BABIES CAN TALK WITH SIGN !

Long before a baby can verbalize their needs they can communicate using sign language. If you start working with your baby between the ages of six and nine months of age they can learn to "talk" in no time at all. Alliance is pleased to offer you the opportunity to learn basic baby sign language in an evening class taught by nationally certified sign language interpreter, Janna Bennett, NIC. Come and join us!
