DENTAL RECOMMENDATIONS DURING PREGNANCY

1. No general anesthesia or nitrous oxide may be used.
2. Any Lidocaine used must be WITHOUT Epinephrine.
3. X-rays should be avoided if possible. If x-rays are necessary, the abdomen must be covered with TWO lead aprons.
4. If antibiotics are necessary, the following may be prescribed:
   - Azithromycin
   - Amoxicillin
   - Augmentin
   - Keflex

Please confirm allergies with the patient prior to prescribing any medications.
5. If pain medication stronger than Regular or Extra-strength Tylenol is necessary, Norco or Tylenol#3 may be used.

Please call our the office with any questions at 517-484-3000.
