

Dental Recommendations During Pregnancy

No general anesthesia or nitrous oxide may be used.

Any Lidocaine used must be WITHOUT Epinephrine.

X-rays should be avoided if possible. If x-rays are necessary, the abdomen must be covered with TWO lead aprons.

If antibiotics are necessary, the following may be prescribed:

Azithromycin

Amoxicillin

Augmentin

Keflex

Please confirm allergies with the patient prior to prescribing any medications.

If pain medication stronger than Regular or Extra Strength Tylenol is necessary, Norco or Tylenol #3 may be used.

Please call our office with any questions at 517-484-3000.
